DIGITAL HANDLES

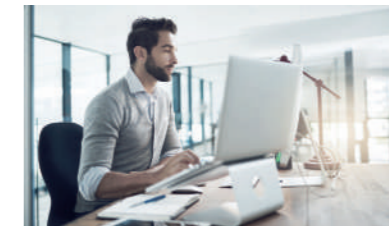

## The ENiQ® Guard Let the Guard handle it.

We'd like you to meet the Guard – proving you can be tough and durable, without foregoing a clean and classy design. Our digital door handles, part of the ENiQ® line, safely secure any interior door you place them on, and look good while doing it.

All different models of the Guard share the same DNA, have a clear family

resemblance, and can be further customized with different handles, ensuring they match both your security needs and interior design. As with any ENiQ® product, the Guard is easily integrated into your ENiQ® Security System, and can handle any task you throw at it.

## Benefits

- DESIGN**  
 Compliment any interior design with the Guard's clean and classy looks. Multicolour informational LED lighting combined with the choice of several high quality stainless steel design handles ensure the Guard always is a true eyecatcher.
- CAREFREE**  
 Thanks to the long stand-by time and large number of locking cycles per battery, maintaining the Guard is a carefree experience. Changing the battery is done in a matter of seconds, and emergency openings are a thing of the past.
- BUILT TO LAST**  
 Our digital door handles are built to last. Robust and strong, the Guard can endure in any environment, boasting the highest grade-of-use (Class 4 certification in preparation in accordance with EN 1906 / prEN 16867).
- TROUBLE-FREE**  
 Mounting the Guard is an effortless endeavour, requiring little to no preparation.
- SUITABLE FOR ANY DOOR**  
 The Guard is easily fitted on any door, including fire- and smoke protection doors, and emergency exits (T90 in preparation/EN179/EN1125). Compatible with retrofit doors and all European interaxis dimensions, and can be overruled with a mechanical key when needed.
- SECURED FROM THE UNSEEN\***  
 It is possible to order the handle of the ENiQ® Guard with an anti-microbial nanosilver coating, scientifically proven to kill 99.9% of harmful bacteria, germs, fungi, even several kinds of viruses.

\*The actual anti-microbial coating is invisible. The blue coating in the image is for illustration and aesthetic purposes only.

## DIGITAL DOOR HANDLES

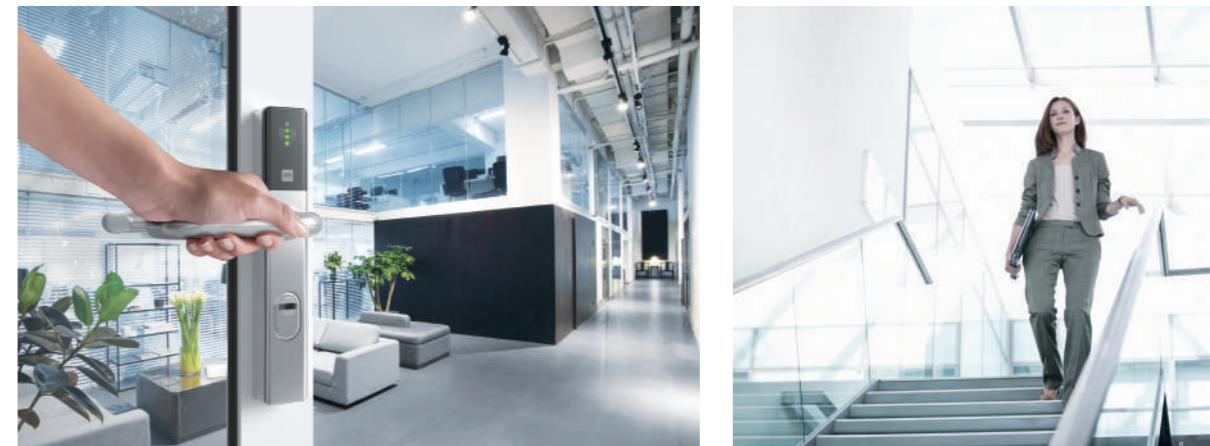

## ENiQ® Guard S

Digital handle for the outdoors

Part of the Guard family, Guard S is a variant specifically designed for outdoor use. Whatever climate you live in, Guard S is ready to protect your building during extreme weather, such as heavy rainfall, extreme snow,

or extreme drought. With its reinforced outer casing, IP66 rated, drilling and cylinder protection, ENiQ® Guard S is a great addition to secure your building from the outside.

## Benefits

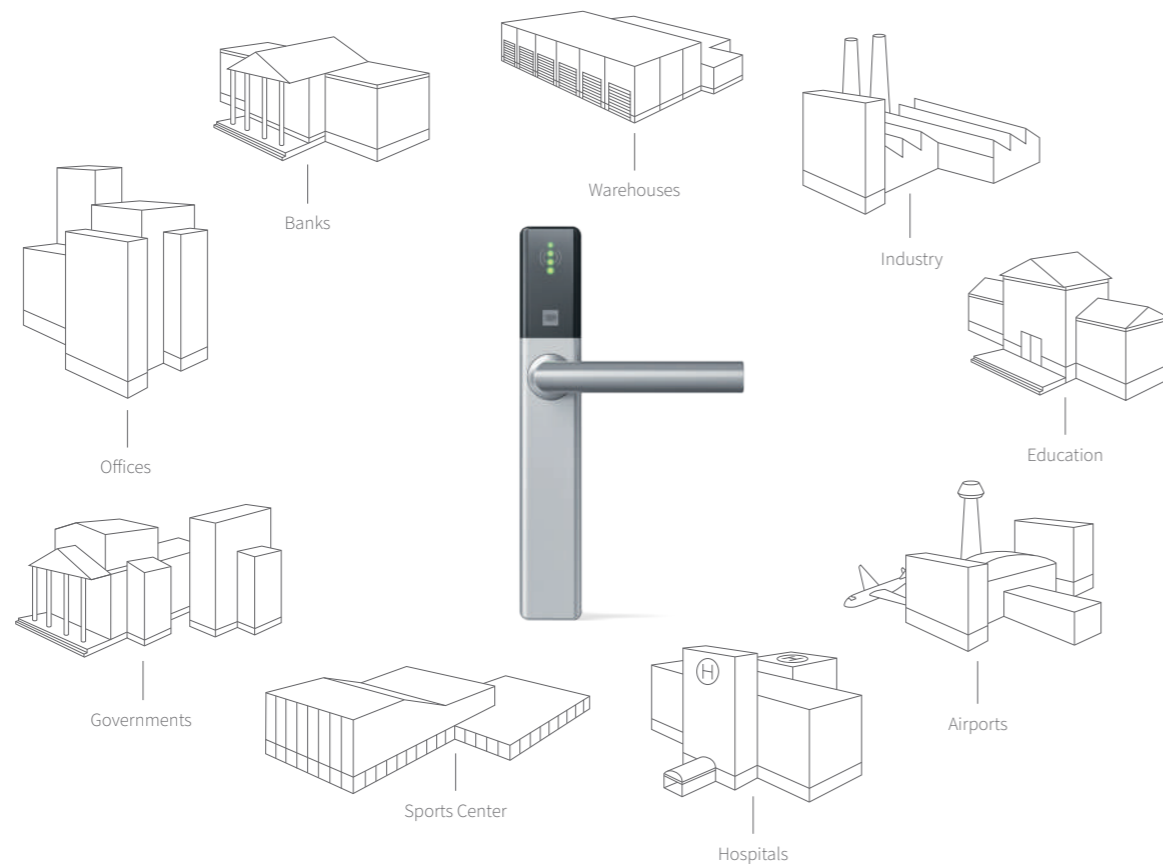

- Against extreme weather**  
 Guard S is built for the outdoors, rated IP66, therefore, it can withstand extremely dry, humid, or wet weather conditions.
- Compatible with other ENiQ® products**  
 The Guard S is manageable with EasyFlex, DOM ENiQ® smartphone app or the ENiQ® AccessManagement Software, no matter your programming method (Data on Card, Data on Device Online, or Offline).
- Out of sight, out of mind**  
 Enjoy Guard S' long battery life with lithium AAA batteries with up to 70.000 battery cycles.
- Combined elegance and security**  
 With its modern design the Guard S meets every taste. Guard S has three design types: Slimline (for tubular frames), Wideline, and Wideline with round rosettes on the inside, suitable for new and renovated doors.
- Strong handle**  
 Guard S' handles are guaranteed with Class 4 handle, robust and resists strongly against vandalism.
- User-friendly signaling**  
 Intuitive virtual and acoustic signaling.
- Flexible and adjustable**  
 Thanks to the adjustable mounting position, Guard S is applicable in almost all door situations.

## Specifications

- NFC and BLE on board
- Class 4 certification according to EN1906 and EN16867
- Standard AAA lithium batteries with up to 70,000 battery cycles
- Suitable for emergency access according to EN 179 and EN 1125
- Flexible installation of handles (left/right direction)
- ES2 security fitting\*, resistance class 2\*, SKG\*\*\* (\*)

DIGITAL HANDLES

## It's all about you

But we're here if you need us.

The DOM ENiQ system is designed to work for you, not to make you work. It allows you to create an unbeatable custom security system, no matter how demanding or specific your wishes. At the same time,

we appreciate that setting up a system like this might not be something you do on a regular basis. That's where your trusted security expert comes into play. They know all the ins and outs of our products and will gladly help you

create your perfect security solution. We're always here for you if you need a helping hand; before, during, and long after the installation of your Digital Security Ecosystem.

## The best of both worlds

Unifying mechanical and digital locking solutions.

Within the DOM ENiQ Security Ecosystem, you can easily create tailor-made security to fit any situation, no matter how big, small or complex. Our extensive library of digital solutions is at your disposal, designed to provide you with uncompromised

and future-proof control. The ENiQ Security Ecosystem even allows you to seamlessly integrate our digital locking solutions into your existing mechanical system. Thanks to the DOM ClipTag - a high security transponder designed to fit nearly any and all DOM mechanical

keys - you can expand our feature-rich digital experience to all your locks. Unify your mechanical and digital systems with ENiQ and unlock endless possibilities - your Digital Security Ecosystem by DOM.

Two systems, one key.

*“We see customers become increasingly demanding when furnishing their offices, so matching digital handles to their doors and interior design in shape and colour is an excellent option.”*

DIGITAL HANDLES

## The Slim- and Wideline variants

The Guard and Guard S have the perfect fitting for every door situation

ENiQ® Guard and Guard S are available in Slimline and Wideline variants. The Slimline is a stylish solution that enhances the look of modern interior. Suitable for both new and existing doors, including tubular frame doors with backsets minimum of 25mm.

Guard Wideline is a variant with a generously proportioned frame (56mm wide cover), therefore, it will cover any damage or signs of use from previous cylinders/digital handles.

Both Slim and Wideline variants are available as long shields or short shields (Compact\*) with handle rosette on the inside and with cylinder rosettes.

\*Only available for ENiQ® Guard

## Guard S variants

## Guard variants

## DIGITAL HANDLES

## Choose your details

The colours and handles that suit your taste and situation

We understand that choosing the digital colour and handle of your digital handle can be a “make-or-break” situation. Therefore, the Guard is prepared with three classic colours

(black, grey, white)\* and two kinds of handles (mitre and rounded), carefully designed to match your needs.

\*The Guard S is only available in black.

### Applications

- Offices and administrative buildings.
- Hospitals, clinics, and retirement homes.
- Banks and hotels.
- Public spaces, such as shopping malls and restaurants.
- Schools, and universities.

## Guard and Guard S Handles

### Handle details

- 9mm Handle spindle with adapter to 7-8-8.5-10mm.
- DIN Left and Right adjustable onsite.
- Upward and downward (max. 45°) handle movement.
- Up to 7° compensation for rest position of the handle.
- Perfect design for installation on tubular frame doors with a small standard backset, which prevents your hand from accidentally getting caught behind the handle.

## MAKE THE ENIQ GUARD TRULY YOURS

Whatever type of building you manage, the Guard's stylish yet universal design makes it the perfect upgrade for any door. Its user-friendly character is further strengthened by the battery choice, allowing for long-lasting performance and easy maintenance.

ENIQ door handles are future-proof and easily set up to function and behave any way you want - through intuitive online connectivity and PC software, using the handy ENIQ app, and configured with transponders or key cards. It truly is your lock, and your choice.
