

ONE LOCKING CYLINDER – LOTS OF ADVANTAGES

Lost your key?

Your key will soon be called a transponder, and losing your key will no longer be a problem! Lost transponders are deactivated at the cylinder using the respective transponder management card.

From a mechanical to an electronic cylinder

Door conversion is fast and straightforward. No drilling, no cables.

Attractive entry level

The ENIQ Pro is the optimum entry-level system to the world of electronic locking technology.

Controlled access authorisation

Purchasing a further booklet enables the number of people to be permitted entry (household staff, babysitters, overnight guests etc.) to be expanded quickly and easily at any time.

Reliable

The battery in the cylinder performs up to 100,000 locking cycles. A multi-level battery warning system lets you know in plenty of time if the battery needs replacing.

Professional advice

Would you like more detailed advice as well as installation? No problem for your local specialist dealer.

Made in Germany

The DOM Group is one of the world's leading manufacturers of innovative locking technology and electronic access systems – both for residential and commercial buildings.

ENIQ® EasyFlex Box + Pro

Innovative and secure door protection

Electronic locking system

NEW!

EDP no. MKTIE298766 / en / 5 / 11.2015 We reserve the right to make technical changes.

THE ENIQ® PRO WITH EASYFLEX SYSTEM

ENIQ® Pro is a mechatronic knob cylinder which can be installed in almost all doors as an electronic access control system.

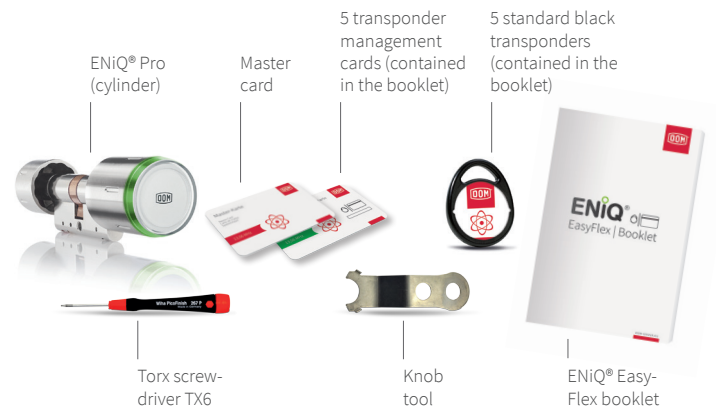

It only takes a few minutes to replace a mechanical locking cylinder by the ENIQ® Pro cylinder – without any complicated cabling at all being necessary. ENIQ® EasyFlex makes straightforward and flexible use of an ENIQ® Pro possible without software.

A specific transponder can be created and deleted quite easily with the aid of the master card and a transponder management card without the transponder having to be "on site". If, for example, a transponder is lost or stolen, complex replacement of the locking cylinder is no longer necessary.

Do you need more than 5 "keys"? No problem. For every further EasyFlex booklet purchased, the system can be expanded by 5 additional transponders.

This makes it an ideal and modern locking system for private homes and smaller offices or commercial units (medical practices, lawyers' offices etc.).

THE ENIQ® EASYFLEX BOX + PRO

THE ENIQ® EASYFLEX BOOKLET

YOUR ADVANTAGES

- No software or online connection necessary (later conversion to software is possible at any time, however, if you expand your system)
- Highest protection classes for the cylinder (tested to VdS BZ+ and SKG***, IP65, E-knobs IP66, T90)
- Can be expanded at any time by further ENIQ® EasyFlex booklets (5 transponders each with appropriate transponder management keys) up to a total of 5,000 transponders
- No follow-on costs (credits) and registration for authorisation actions
- Illuminated ring for optical signalling
- Combinations with mechanical DOM locking systems by means of the DOM ClipTag
