

Press release on Security Essen 2018

## **DOM Security Ecosystem**

From advanced reversible key and security systems to new apps, DOM will be presenting numerous innovations to visitors at Security Essen 2018 that make security even more convenient.

The milestone in the field of mechanical reversible key systems, the ix TwinStar®, is now followed by further developments of the highly secure reversible key series of the new ix Twido® and the ix Teco®. DOM offers the ideal fusion of mechanical keys and electronic transponders with the new DOM ClipTag V 2.0, which comes with a completely new design and is equipped with all current Mifare and 125 kHz transponder technologies.

### **Everything at a glance**

Even in the digital field, the wheels at DOM do not stand still. After the first presentation of the DOM Tapkey at the Security Essen 2016, DOM now presents the further developed DOM Tapkey in the second generation. Equipped with the BLE function (Bluetooth Low Energy), Apple users can now also take advantage of its benefits.

With the new DOM ENiQ® App (the first app with VdS 2-star certification) you can easily and intuitively manage digital locking cylinders, fittings, wall readers and personal licenses of DOM on your smartphone - locally and without any cloud system.

### **Added value by cooperation**

With the "Security Ecosystem", DOM presents a world full of possibilities to meet certain security requirements with a portfolio of digital locking solutions. The Keystone program offers exclusive, tailor-made expert solutions that help retailers improve their business at all relevant levels.

DOM Sicherheitstechnik  
GmbH & Co. KG

Wesseling Str. 10 – 16  
D-50321 Brühl/Köln  
Tel. +49 (0) 22 32 7 04 – 0  
Fax. +49 (0) 22 32 7 04 – 419

The experts from DOM will present the innovation "DOMConnect" with OSS (Open Security Standard) live on site, which enables simple integration of the DOM products into existing third-party systems. Two completely new digital ENiQ products will also be presented to the public. So a visit is worthwhile!

#### **About DOM**

DOM is one of the leading international manufacturers of safety technology. The product range extends from patented mechanical locking cylinders and digital access control systems to anti-panic devices and door closers. Customers worldwide trust in the quality and know-how of DOM. Production takes place at twelve locations throughout Europe - including the main location in Brühl near Cologne. The headquarters of DOM is located in Paris. A comprehensive network of distributors and specialist dealers ensures that the optimum security solution is found for every private user, public institutions and customers from the commercial/industrial sector. Further information is available at [www.dom-security.com](http://www.dom-security.com)
