DOM ClipTag V 2.0

The ideal merging of your mechanical key and electronic transponder

Advantages

- The latest transponder technologies
- Saves space on the key ring
- With individual colours

One locking medium for electronics and mechanics

Mechanical key and electronic transponder perfectly merged.

All conventional systems in the RS series and all reversible key systems in the ix series can be integrated or retrofitted to the new DOM Clip Tag V 2.0.

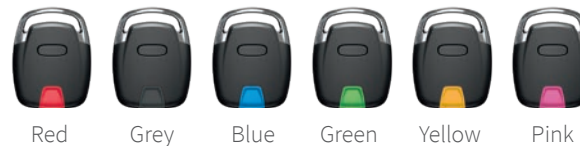

In this way, a single locking medium can be used for both worlds – mechanical and electronic – thereby reducing the bulk of the key ring.

The new DOM ClipTag V 2.0 is available in the following technologies:

- 1) Mifare Desfire EV2
- 2) Mifare Classic
- 3) Hitag S, Hitag 1, Hitag 2
- 4) EM4200

Including 6 coloured clips for perfect customising of your key

DOM ClipTag V 2.0

The new DOM ClipTag V 2.0 has a lot to offer. In a completely new design and equipped with the latest Mifare and 125 kHz transponder technologies, it combines the world of conventional mechanical locking systems with that of highly innovative electronics. Simply open the ClipTag and insert the matching DOM key, and you have two locking media in one unit. This saves space on the key ring and can also be individualised in a colour of choice. It couldn't be easier.

Application examples

With the new DOM ClipTag V 2.0 – one day in your company.

Your employees use the ClipTag transponder to open the turnstile to the company grounds and also log into the time recording system at the same time. The main building and the security-relevant departments are also secured with electronic lock cylinders and fittings, and only open to employees that are authorised by their ClipTags. The key for those areas that are secured with mechanical locks is integrated into the ClipTag. They 'punch out' again electronically when they leave the company grounds at the end of the working day. The hybrid solutions of DOM - ClipTags, mechanical locking systems and electronic access control systems allow you and your workforce to open all doors, which you are authorised to open, with just one key on your key ring.
